

Australian Senate

Bob Brown
Australian Greens Senator for Tasmania

JAPANESE TOURISTS PLANTED 30,000 TREES TO SAVE KOALA BEAR

My warmest congratulations and admiration - 30,000 trees for birds, wildlife and to help the planets' atmosphere!

Sadly in Tasmania this year 150,000 logtruck loads of ancient forests will be exported to Japan to make paper.

I look forward to working with you all to end this destruction.

Please do come to Tasmania when you can.

My warmest wishes,

Senator Bob Brown
